

EDUCATION

Indraprastha Institute of Information Technology Delhi [IIIT DELHI]	Delhi, India
<i>Bachelor of Technology - Computer Science and Artificial Intelligence</i>	<i>Nov 2022 - Jun 2026</i>

SKILLS
• Programming: Python, SQL, C++, Java, C, Haskell • Artificial Intelligence: Machine Learning, Deep Learning, Generative AI, Agentic AI, Large Language Models (LLMs), Natural Language Processing, Computer Vision, Retrieval-Augmented Generation (RAG) • LLM Engineering: LangChain, LangGraph, MCP (Model Context Protocol), AI Agents, Function Calling, Agent Orchestration, Semantic Search • Data & Infrastructure: FAISS, Vector Databases, Neo4j, Apache Spark, Hadoop • Core CS & Mathematics: Data Structures & Algorithms, Operating Systems, DBMS, Probability & Statistics, Linear Algebra • Domains: Quantitative Finance, Robotics, Multilingual AI

EXPERIENCE

Open Source Contributor
<i>Crawl4AI (70K+ GitHub Stars)</i> ◦ Diagnosed root cause of an lxml version conflict breaking installs with co-dependencies and on Python 3.14; verified fix via regression testing and dependency resolution across pip/Poetry, credited by maintainers and incorporated upstream.
Undergraduate Researcher, IIIT Delhi
<i>Jan 2025 – Apr 2025</i> ◦ Prof. Pragya Kosta: Built CNN-BiLSTM and BNCNN models to predict retinal ganglion cell firing rates from electrophysiology data, delivering a full deep learning pipeline for neural signal decoding. ◦ Prof. Ravi Anand: Broke lightweight ciphers with deep learning distinguishers hitting 74% accuracy, combining ResNet/CNN-BiLSTM architectures with differential cryptanalysis across cipher families.

PROJECTS

AegisRag-Engine: Offline Enterprise RAG Platform	Github, Live Demo
<i>RAG, FAISS, Vector Databases, NLP</i> ◦ Architected a fully offline, air-gapped RAG platform (LangChain, FAISS) with a modular pipeline for semantic chunking and dense vector retrieval, purpose-built for privacy-sensitive enterprise environments where no external API calls are permitted.	<i>Jun 2026</i>
Adversarial Contingency Auctions	Github, Live Demo
<i>Multi-Agent Systems, Robotics, Decision Making</i> ◦ Designed a decentralized multi-agent auction algorithm integrating contingency branching and inconsistent-belief modeling to handle adversarial blockages, enabling resilient task allocation for robot teams operating under uncertain, dynamically changing conditions.	<i>Apr 2026 – May 2026</i>
Gendered Abuse Detection in Indic Languages	Github, Live Demo, Kaggle
<i>Deep Learning, NLP, Multilingual AI</i> ◦ Built a multilingual abuse detection pipeline using robust preprocessing, multi-task learning, and XLM-RoBERTa/CNN-BiLSTM models for English, Hindi, and Tamil tweets, achieving a 0.67771 Macro F1 score and surpassing the highest public benchmark of 0.61604 on the ICON shared task.	<i>Feb 2025 – Apr 2025</i>

CERTIFICATIONS

• Anthropic 8+ AI Certifications	Certificate Link
• Micro1 AI Certified 2026	Certificate Link
• Self Driving Cars, University of Toronto	Certificate Link
• Functional Programming I and II (Haskell MOOC), University of Helsinki	Certificate Link

HONORS AND AWARDS

• Secured 3rd place among 100+ teams in <i>Sherlocked Enigma '25</i> at Lady Shri Ram College
• Core member, <i>Math Talk 2024</i> – organized by Math Club (Evariste), drew 150+ participants
• Member, performer, <i>Music Week 2025</i> – hosted by Music Club (Audiobytes), with 100+ participants

POSITIONS

• Events OC , Odyssey IIIT Delhi Cultural Fest	Jan 2024
• Core Member , Evariste IIIT Delhi Math Society	Nov 2022 - Present
• Core Member , Audiobytes IIIT Delhi Music Society	Jan 2025 - Present
